

## ADVANTAGES

- Seamless integrations with BMS systems
- Easy and flexible installation on walls, ceilings or floors
- Energy saving through intelligent control system
- Energy-efficient PM1 particle filters and carbon filters

<b>Application</b>	Large industrial environments such as warehouse and logistic facilities, food and beverage production factories, and sensitive processing and assembly industries.
<b>Comment</b>	Power supply: 3-phase or single-phase Filter: Particle filters to control PM1 and carbon filter for odors and chemicals Fan: EC fan with adjustable constant airflow Communication: Modbus or BACnet Installation: Stationary, floor wall or ceiling mounting
